

PRACTICAL & EASY TO INSTALL SOLUTIONS

LOW VOLTAGE CONSUMER UNITS & DISTRIBUTION BOARDS UP TO 250 A

[--> CATALOGUE PAGES INSIDE](#)

THE **GLOBAL SPECIALIST**
IN ELECTRICAL AND DIGITAL BUILDING INFRASTRUCTURES

 **legrand**[®]

The Legrand ranges of British standard consumer units and Convivio™ distribution boards are especially designed in order to provide quick & easy installation, safety and reliability in the electrical installation of residential or small commercial buildings. Both of them allow to achieve assemblies conform to IEC 61439.

BRITISH STANDARD CONSUMER UNITS

PRACTICAL AND FUNCTIONAL 1P+N AND 3P+N
BRITISH STANDARD METAL CONSUMER UNITS.

CONVIVIO™ DISTRIBUTION BOARDS

COMPLETE READY TO USE 3-PHASE DISTRIBUTION
BOARDS UP TO 250 A.

P6

legrand

British standard consumer units

Designed
to be practical
and functional

The IP41 British standard metal consumer units are designed to meet the needs of residential and small commercial buildings installations. They can be also used in hotels to equip rooms for example.

Available in 2 versions Single-phase + neutral and 3-phase + neutral, to ensure optimised distribution on different types of sites.

9 SIZES OF CONSUMER UNITS

Single-phase + neutral:
from 4 to 16 ways
3-phase + neutral:
from 4 to 12 ways.

1 CATALOGUE NUMBER = 1 COMPLETE CONSUMER UNIT

The same cabinet can be flush or surface mounted (easier choice and only few catalogue numbers to store).

Single-phase + neutral.

3-phase + neutral.

DESIGNED FOR THE RESIDENTIAL SECTOR OR SMALL COMMERCIAL BUILDINGS

Flush or surface mounting

Multiple benefits allowing simplified installation and electrical distribution

Removable cable entry plate, precut cable entries, fork-type supply busbars, ergonomic handle or box finishing ...

the benefits of the British standard consumer units are numerous. They have been designed to simplify the installer's work and to save time during installation and wiring.

Neutral and Earth terminal blocks.

DIN rail for modular equipment.

Fork-type supply busbar for easier wiring operations (supplied with the consumer units).

Flush or surface mounting according to required configuration. No additional accessories needed.

Specific labels on each side of the cabinets for easy identification of the earth terminals.

The box is painted in the same colour like the door and the faceplate, ensuring a perfect finish when the cabinets are surface mounted.

Significant time saving thanks to the precut cable entries at the top and at the bottom of the cabinets. Diameter: max. 32 mm.

Easily removable cable entry plates at the top and at the bottom of the cabinets, allowing the installation of large dimensions ducts.

Integrated earthing system, fixed directly on the door for immediate accessibility.

Ergonomic handle. A simple finger push opens the door easily. Made of plastic for good resistance to corrosion.

Face plate without cutting edges for maximum protection of the users when the cabinet is surface mounted.

legrand

Convivio™, distribution boards

**Complete
ready to use
distribution
boards**

Specially designed for the residential sector or small commercial buildings, the new range Convivio™ distribution boards can be installed in individual houses, villas or blocks of flats. With their sophisticated design and neutral colour they blend in discreetly in all types of contemporary interiors.

8 SIZES OF BOARD

from 4 to 18 three-pole ways.

1 CATALOGUE NUMBER = 1 COMPLETE, READY TO USE BOARD

Only a few catalogue numbers to store (the same board can be flush-mounted or surface-mounted).

DESIGNED FOR THE RESIDENTIAL SECTOR OR SMALL COMMERCIAL BUILDINGS...

An optimised range

Simple choice
according to the type
and rating of the circuit
breaker and number
of outgoing terminals

Available in 3 versions according to the main circuit breaker, the new range represents a very competitive advantage on residential sites, with the number of catalogue numbers halved. The boards are ready to use, with pre-fitted doors, faceplate, distribution system, connection terminals, neutral and earth terminal blocks and fixing device for the main circuit breaker.

UP TO 125 A

MODULAR CIRCUIT BREAKER
1 MODULE/POLE UP TO 125 A.

Board equipped with DIN rail,
ready to take the modular
circuit breaker.

UP TO 250 A

DRX 125 OR DRX 250 MCCB ACCORDING TO THE BOARD VERSION CHOSEN.

Board supplied with plate,
terminals and terminal shield.

Board ready to take the MCCB.

Fitting the circuit breaker and
terminal shield.

Fixing the circuit breaker on a plate.

Fitting the terminal shield.

Easy installation and wiring

From the board to the
circuit breaker,
everything is done
to simplify installation

Convivio™ distribution boards have been designed to save time and make installation as easy as possible, making it ideal for the residential market, which is particularly competitive.

Height adjustment under the circuit breaker fixing plate.

Neutral terminal block with high-capacity terminal.

Earth terminal block. Same number of connections as the number of outgoing terminals on the board.

Coloured labels to identify each phase on the busbar and on the faceplate.

High quality and strength

Choosing a Convivio™
distribution board
means choosing
Legrand quality

Legrand has always been committed to complying with standards to ensure optimum safety on sites, and ensures its products all incorporate the high quality, strength, reliability and immaculate finish for which the brand is renowned.

WITH IEC 61439-2 STANDARD

Door.

Finish frame.

Integrated handle.

Faceplate with 1 set of stickers for identifying each phase.

Identification label for the distribution board.

The faceplate is pre-cut according to the size of the main circuit breaker.

Terminal shield for the main circuit breaker (supplied with the board).

Terminal shield on outlets that are not in use.

Distribution board identification label.

Main circuit breaker identification label.

Convivio™ 3-phase distribution boards

from 12 to 54 poles

Technical characteristics **p. 17**

3-phase distribution boards for DIN-rail mounting circuit breakers
 IP 40 - IK 08 with door
 Conform to standard IEC 61439-3: busbar type tested (Lovag certified)
 Maximum voltage 480 V \sim ; Rated short-time withstand current (Icw): 17 kA 0.2 s
 Rated peak withstand current (Ipk): 34 kA
 Ambient temperature: 50 °C continuously
 White RAL 9003

Supplied with: surface or flush-mounting box, door with handle, faceplate, fully isolated tin plated copper busbar
 The number of holes of earth and neutral terminal blocks are equal to the number of outgoing devices
